

  **FEDER
UNACOMA**
Italian Agricultural Machinery
Manufacturers Federation

Mechanizing the world

AGRIDIGITAL

is the association which represents the manufacturers of solutions and services based on digital technologies for agricultural and garden machinery.

ASSOIDROTECH

is the association which represents the manufacturers of systems, machinery and technologies for irrigation in agriculture and gardening.

ASSOMAO

is the association which represents the manufacturers of implements for: tilling, seeding, transplanting, fertilizing, crop protection, harvesting, first processing after harvesting, livestock raising and handling and transport.

ASSOMASE

is the association which groups the manufacturers of self-propelled machines (all agricultural machinery with one or more axles and powered by an engine, other than tractors).

ASSOTRATTORI

is the association which groups the manufacturers of tractors.

COMACOMP

is the association which groups manufacturers of: mechanical components, hydraulic components, electric-electronic components, miscellaneous components, irrigation components and spraying components.

COMAGARDEN

is the association which groups manufacturers of garden machinery.

COMAGARDEN
Garden Machinery
Manufacturers Association

The Federation acts as an umbrella organisation for seven industry associations representing various sectors of the agricultural, forestry and gardening machinery industry, with the aim of promoting mechanisation and technological innovation to meet the different needs in agriculture and green care.

A federation of mechanical engineering industry

FederUnacoma has been representing the interests of a broad spectrum of mechanical engineering companies within Confindustria's system since 1945. The Federation groups the associations of manufacturers in the field of machinery, equipment and technology for agriculture, gardening and green keeping and components.

The industrial companies represented by the Federation play a key role on the international stage, holding high-ranking positions in terms of production capacity, breadth of range and effectiveness in meeting the most various demands of the agricultural and related sectors.

Through FederUnacoma the Italian mechanisation enterprises are able to interface with institutions, promoting innovation, business culture and their presence in national and international markets.

Italian production of tractors, agricultural machinery, garden machinery and related components - (€ 13.7 bln in 2021)

The Italian production value of tractors and agricultural machinery reached € 9.4 billion, together with components and garden machinery production value of € 3.3 billion and € 970 million respectively in 2021.

COMPONENTS

3,3 bln

**GARDEN
MACHINERY**

970 mln

A system of services for businesses

FederUnacoma provides the affiliated enterprises of each association with the services they need to improve business development and operations. Studies and statistics, technical standards, internationalisation, exhibition events, communication, training and sector representativeness are among the basic activities carried out by the federation, which has an articulated and efficient structure with offices in Rome, Bologna and Brussels.

Vocation for internationalisation and foreign markets

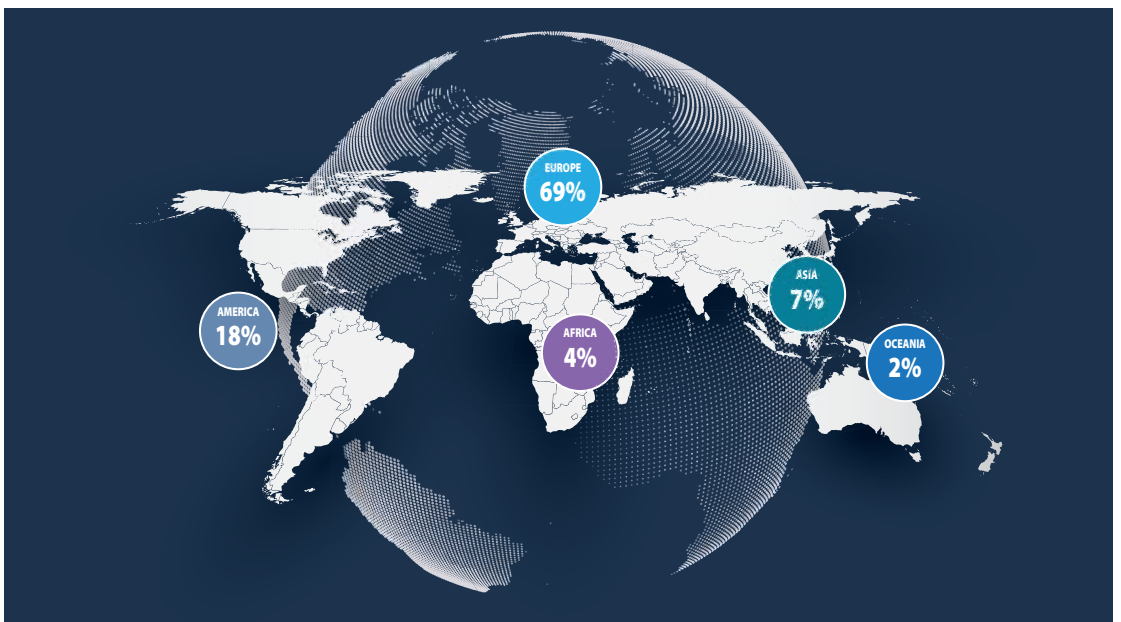

Having evolved in close contact with the highly varied agricultural practices in the different regions of the country, the Italian agricultural mechanisation industry has designed and developed technologies for all types of processes and for all climatic and environmental conditions.

This background has allowed many companies making up the productive fabric of the sector to manufacture a vast range of machinery and equipment able to meet technological demands from the Italian regions and above all from foreign markets. The machines produced by the Italian manufacturers, specialised in arable crops as well as in horticulture, fruit-growing and wine growing, are in high demand in many parts of the world thanks to their proven capability to be suitable to the most different agricultural practices.

Product categories falling within the scope of the Federation include machinery, other than tractors, for: soil-working; sowing, transplanting and fertilizer distribution; crop protection; irrigation; harvesting; first processing and conditioning of products; livestock husbandry; handling and transport; forestry and agricultural and forest biomass treatment. In the garden sector the Federation counts the national industry of equipment for professional and hobbyist greenkeeping whilst in the wide sector of componentry represents the manufacturing companies of components or systems of components for OEM or spare parts for agricultural and garden machinery.

Lastly, it includes the digital technologies sector applied to agriculture for the development of increasingly productive and sustainable agricultural systems.

Exports by geographical areas

Promotional and exhibition events

FederUnacoma organises a range of high profile international events in the field of promotion and trade exhibitions: **EIMA International** (International Agricultural and Gardening Machinery Exhibition) in Bologna, a prestigious biennial event that offers a preview of the best products on the world stage, with around 1,950 exhibitors from more than 50 countries and a total number of 50,000 model on display in 2018; **Agrilevante**, an additional international exhibition of technologies for the agricultural production chain held biennially in Bari in the south of Italy and focused on markets and products of the Mediterranean area; **EIMA Show**, a dynamic exhibition with field trials organised both in Italy and abroad; **EIMA Agrimach** (International Exhibition of Agri-Machinery & Equipment), which is held biennially in New Delhi and offers mechanisation companies a direct contact with an increasingly important market such as that one of the Indian subcontinent. In addition, working in collaboration with the Italian Ministry of Foreign Affairs and International Cooperation and the Italian Trade Agency (Agenzia ICE) and with trade fair organizations in different countries, FederUnacoma also organises a large number of the Italian exhibiting areas at the main foreign sectoral events.
